

---

Below is a list of deleted, new and revised ADA codes that will be in place January 1, 2016.

**Please note descriptions of sedation codes and specific graft procedures. The entire description will not display in Axiom so I will post these on the Axiom Training site- Links on top toolbar- Axiom Help Training**

-

#### **Deleted**

D0421 - Genetic test for susceptibility to oral diseases

D9220 – Deep sedation/general anesthesia (first 30 minutes)

D9221 – Deep sedation/general anesthesia (each additional 15 minutes)

D9241 – Intravenous moderate (conscious) sedation analgesia (first 30 minutes)

D9242 – Intravenous moderate (conscious) sedation/analgesia (each additional 15 minutes)

D9931 – Cleaning and inspection of a removable appliance

#### **New**

D0422 – Collection and preparation of genetic sample material for laboratory analysis and report

D0423 – Genetic test for susceptibility to diseases

D4283 – Autogenous connective graft procedure (including donor and recipient surgical sites) each additional contiguous tooth, implant or edentulous tooth position in same graft site

- Used in conjunction with D4273

D4285 – Non-autogenous connective graft procedure (including donor and recipient surgical sites) each additional contiguous tooth, implant or edentulous tooth position in same graft site

- Used in conjunction with D4275

D9223 – Deep sedation/general anesthesia (each 15 increment)

D9243 – Intravenous moderate (conscious) sedation/analgesia (each 15 increment)

D9932 – Cleaning and inspection of removable complete denture, maxillary

- This procedure does not include any adjustments

D9933 – Cleaning and inspection of removable complete denture, mandibular

- This procedure does not include and adjustments

D9934 – Cleaning and inspection of removable partial denture, maxillary

- This procedure does not include any adjustments

D9935 – Cleaning and inspection of removable partial denture, mandibular

- This procedure does not include any adjustments

D9943 – Occlusal guard adjustment

#### **Revised**

D4273 – Autogenous connective graft procedure (including donor and recipient surgical sites) front tooth, implant, or edentulous tooth position in graft

- There are two surgical sites

- The connective tissue is dissected from a separate donor site leaving and epithelialized flap for closure

D4275 – Non-Autogenous connective tissue graft (including recipient site and donor material) first tooth, implant or edentulous position in graft

- Preformed to create or augment the gingival, with or without root coverage
- There is no donor site

D4277 – Free soft tissue graft procedure (including recipient and donor surgical sites), first tooth, implant or edentulous tooth position in graft

D4278 – Free soft tissue graft procedure (including recipient and donor surgical sites), each additional contiguous tooth, implant or edentulous tooth position in same graft site

- Used in conjunction with D4277

D9248 – Non-intravenous conscious sedation

- This includes non-IV and moderate sedation. A medically controlled state of depressed consciousness while maintaining the patient's airway, protective reflexes and the ability to respond to stimulation or verbal commands. It includes non-intravenous administration of sedative and/or analgesic agent(s) and appropriate monitoring.

- The level of anesthesia determined by the anesthesia provider's documentation of the anesthetic's effects upon the central nervous system and not dependent upon the route of administration

.
